Service for Perishable Goods

## About TIR

The National Logistics Corporation (NLC), Pakistan's leading multimodal logistics organization is at the forefront of building regional connectivity and transforming trade. NLC is extending valuable contributions towards boosting economic activities by ensuring cost-effective and time-efficient movement of goods from the point of origin to the destination. Transports Internationaux Routiers (TIR) system is the key to unlocking new markets and connecting businesses across the region. With the help of TIR operations, NLC now offers an opportunity to business entities to transport their goods by road in 10-20 days from Pakistan to China, Russia, Central Asian Republics, Turkiye and Azerbaijan.

## Specialization in TIR Road Transportation

One of our core strengths lies in NLC's specialization in TIR road transportation, a testament to the proficiency of the organization in facilitating seamless cross-border movements of cargo. The matchless expertise in this domain ensures that international deliveries are executed efficiently, offering a one-window solution for all logistics needs.

## Multimodal TIR Operations for Transit Cargo

NLC offers logistics solutions for international customers, enabling the direct movement of shipping line containers from Karachi ports to destinations like China, Russia, Turkiye, Afghanistan, Uzbekistan, Kyrgyzstan, Turkmenistan, Tajikistan, Kazakhstan & Azerbaijan using the TIR system. With cross-stuffing and cross-docking services at Karachi ports, NLC saves detention charges and ports demurrages.

## Comprehensive End-to-End Solutions

NLC offers comprehensive end-to-end logistics solutions starting from warehouse in the country of origin to all the way to final destination with minimum customs interventions at borders.

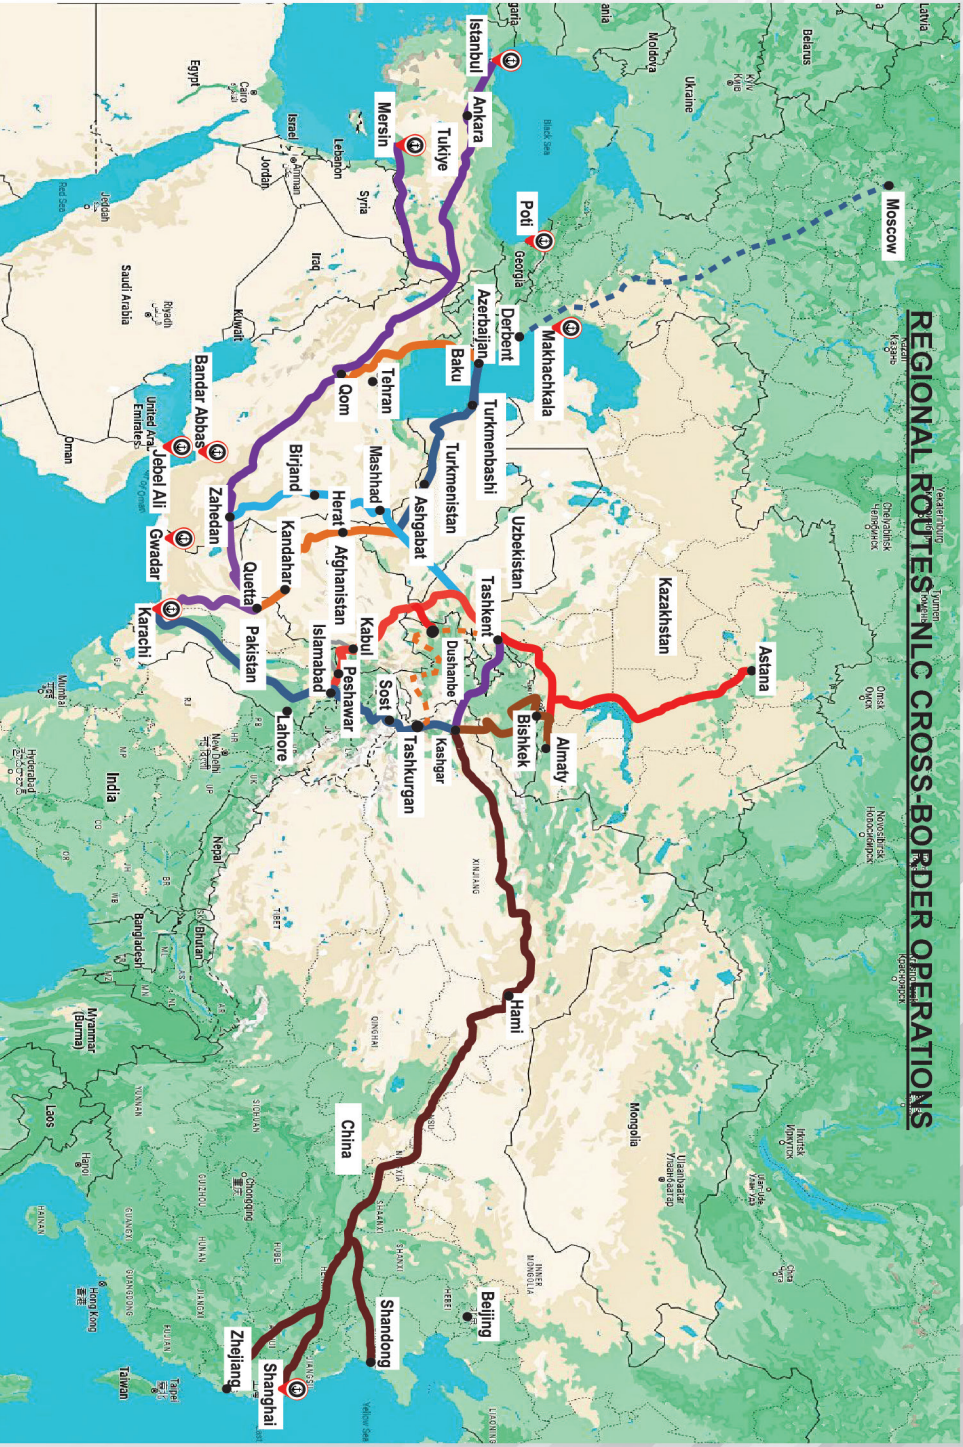

## Reefer Service

NLC offers cross-border Reefer Service to regional countries. The service provides the exporters with opportunity to transport perishable items in refrigerated containers. The transportation of such cargo under TIR system slashes the transit time and cost without compromising the quality of perishable items. Services for fresh produce, sea food, meat & frozen items, vegetables and fruits including bananas, kinnow and mangoes are available for Central Asian Republics, China, Turkiye, Russia & Azerbaijan.
