

# Ultimate Building Machine (UBM)

*The Ultimate Construction Solutions*

## About us

UBM is a cutting edge technology that constructs buildings quickly and efficiently. Also known as factory on wheels, the machine can fabricate and assemble whole buildings with no requirements of trusses, columns, beams, screws, bolts or fasteners. The life-time, rust-free, fireproof and water tight structures can be designed with the help of special software as per requirements and aesthetics of the client without any need for consultancy from architects or engineers.

## Why UBM?

The structures built through UBM are cost-effective, durable, flexible in designs and very low on maintenance. The machine can be transported to remote areas for quality construction works where building concrete structures is highly expensive.

## Advantages

- Meets high safety standards including European CE compliance.
- Cost-effective solution and simplified construction.
- Proven functionality in severe weather conditions.
- Watertight, rust-free, earthquake resistant and fireproof.
- Virtually maintenance-free structure. Implement pre-existing designs or create a new one.
- Can construct all terrain buildings.

## Usages:

### ➤ Farming:

Roofed livestock pens, food storage, distribution and warehousing, barns and stables etc.

### ➤ Industries:

Industrial units, laboratories, refineries, processing plants, covered storages for factory waste, etc.

### ➤ Commercial:

Covered walkways, maintenance facilities, market places, museums, common areas, etc.

### ➤ Public Spaces:

Managerial buildings, hospitals, gyms, mosques, parks, schools, tunnel lining etc.

### ➤ Military Use:

Quarters, base edifice & reconstruction, equipment maintenance and repair workshops, stores & border posts, aircraft & helicopter hangars etc.

### ➤ Housing:

Dormitories, inexpensive housing.

### ➤ Leisure:

Camping facilities for tennis courts, golfing ranges, bowling alleys and swimming pools etc.
